

NJ22

For Termination of Jnet and Ethernet shared in a single CAT5 cable

Junction will connect between all of the following:

Jnet:
 2 x CAB60 (RJ8 connectors - blue pair)
 1 x 2 core (2 screw terminal connectors)
 1 x CAT5 UTP (IDC connector BL & BL/W pair)

Ethernet:
 1 x CAT5 UTP (IDC connector OR & OR/W and GN & GN/W pairs)
 1 x CAB55 (RJ45 connector)

NOTE:

- Connections made to screw terminals connections should be made using unscreened 2 core cable. (eg 7/0.2-2)
 If screened cable is used, the screen should ONLY be connected to earth at one end or left unconnected.
 (UNDER NO CIRCUMSTANCES SHOULD THE SCREEN BE CONNECTED AT BOTH ENDS)
 The flexible cable should be terminated in the correct size of boot-lace ferrule.
- When using ethernet and Jnet on same cable, separated termination is required at Network Controller patch panel.

THIS IS AN UNCONTROLLED COPY - UNLESS STAMPED WITH CONTROLLED COPY STAMP
