7. OPTIMISING EVAPORATOR DATA						
<p>The data from all the attached evaporators appears in the following data items. This data is unsorted and appears in the zone order of the network controller. The data is in blocks of 10 items starting at item 410 - 415 for the first associated evaporator the next evaporator is in items 420 - 425 up to the maximum of 48 evaporators on OP148 items 880 - 895</p>

8. CLOCK CALENDAR						
<p>Note, from version 0.00.4 the time and date can be displayed as standard or daylight saving (summer) time. This choice is made on item 18. When daylight saving is chosen and the controller is connected to a JTL Network Controller supporting daylight saving operation, the change is made automatically to the current EU directive.</p>
